

.hello

.hello

Your space.
Nobody else's.

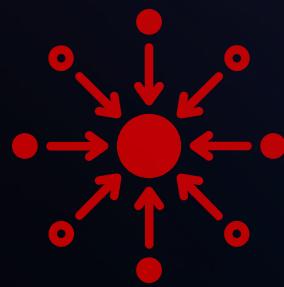

We are the world's first user-controlled,
open-source, web3 decentralized storage software.

The whole human population generates about
10 Petabytes / Second

We need to find better ways to store all this data in a
sustainable, scalable, efficient and user-controlled way.

The Actual Problem; Centralization. Web2

**Centralized storage,
inefficient,
unsustainable, expensive
and poor scalability.**

**Centralized login - Web2 login,
the user has no
control over his data or the
access to it.**

Our Solution; Decentralize. Web3

**Decentralized storage,
very cheap,
sustainable, super efficient and
highly scalable.**

**Decentralized login - Web3 login,
the user has full
control over his account and
access to it.**

There is NO "dropbox" for web3 users (+450M)

With Web3 Access
